Term Definitions

- **HP – Hit Points:** The life force of each Player and Character card.
- **TP – Technique Points:** A value that is used to play most types of cards.
- **PLV – Powerlevel:** The damage potential of each Player and their Characters.
- **Turn:** An entire set of Phases for a single Player.
- **Round:** A single cycle of every Player's Turns.
- **Deck Zone:** The zone where your Deck is stored.
- **Fighter Pool Zone:** The zone where your Fighter Pool is stored.
- **Discard Pile Zone:** Where all destroyed cards go.
- **Rift Zone:** Where all imprisoned cards end up.
- **Hand:** The cards you're currently holding.
- **Character Zone:** You play Characters to the Character Zone.
- **Backup Zone:** You can move Characters to and from your Backup Zone from your Character Zone during the Aftermath Phase.
- **Equip Zone:** You play most other cards here.
- **Arena Zone:** You play Zone cards here. You can only have 1 card in the Arena Zone at a time unless otherwise stated.

Introduction

F.A.D.E. is a trading/collectible card game between 2 to 4 players where you battle each other using similar systems found in Fighters, Beat-em-ups, and Action-themed Anime/Manga, as well as various other trading card games.

Setup Process

Required materials to play this game include:

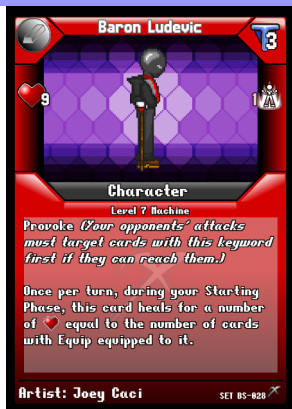

- Pencils and Paper for various stats tracking
- Tokens, Counters, and Coins for various stats tracking
- At least a 40-card Deck for each player
- An optional Fighter Pool made of Character cards

Before starting, all players must shuffle their Decks and put them in their Deck Zone, then put their Fighter Pool nearby without shuffling it. Each player starts with 50 HP, 0 TP, and 1 PLV. Determine who goes first with Rock-Paper-Scissors, then each player draws 6 cards. Turn order by default goes clockwise.

Mulligan

When drawing your initial Hand of 6 cards at the start of the game, you may choose to shuffle your Hand back into your Deck and draw a new hand of 6 cards. You may only do this once per start of the game.

Card Anatomy

Elements, Name, Cost

HP

PLV

Supertypes
Level/Rank/Archetypes

Card Effect Text

Artist, Set Code, Set Symbol

- Elements are shown in the top-left corner of the card. Each card can have up to 2 Element Symbols listed here.
- The card's Name is in the top-middle section of the card.
- The card's Cost, labeled with a value of TP, is in the top-right of the card.
- HP is listed in the center-left portion of the card next to the illustration.
- PLV is listed in the center-right portion of the card next to the illustration.
- The card's Typecasting is in white text under the illustration. Under that is the card's Level or Rank.
- In the slightly lighter area on the card is the card's Effect and Flavor Text.
- On the bottom of the card is the Artist, Set Code, and Set Symbol of the card.

Card Rarity

Some cards have different text, border, and set symbol colors. This tells you the rarity level of the card. Each step of rarity higher than Common makes the card either more powerful and/or more difficult to use.

- **Common:** Black set symbol with white outline.
- **Uncommon:** Gray set symbol.
- **Rare:** Green set symbol.
- **Super Rare:** Blue set symbol.
- **Ultra Rare:** Pink/purple set symbol.
- **Omega Rare:** Gold set symbol.

Turn Steps

Each turn is made up of Phases, each with their own rules. All players must go through each of these phases in order, but can choose to skip each separate sub-phase of the Battle Phase.

- **Starting Phase:** Some effects activate during this Phase. Once completed, you gain 1 TP.
- **Draw Phase:** Some effects activate during this Phase. Once completed, draw a card from the top of your Deck. The player going first doesn't draw a card during their first turn.
- **Battle Phase:** The Battle Phase is made up of multiple sub-phases, each with their own separate rules.
 - ♦ **Preparation Phase:** During the Preparation Phase, you may perform any of the following:
 - Play Characters from your Fighter Pool face-up into the Character Zone or Backup Zone unless otherwise stated. You must have at least 1 Character in your Character Zone before playing Characters to your Backup Zone.
 - Attach Skills or Reactions to Characters face-down unless otherwise stated. Pay their cost when they're revealed.
 - Play Items or Augments face-up, paying their costs.
 - Play Zones face-up. More info on both of these can be found later in this book.
 - Put Characters from Character Zones into your Backup Zone unless they can't act, or put Characters from your Backup Zone into Character Zones unless they can't act. They retain all attached cards and status.
 - ♦ **Combat Phase:** The Combat Phase is where all the action is. It'll be thoroughly explained in the Combat Info section.
 - ♦ **Aftermath Phase:** The Aftermath Phase plays similar to the Preparation Phase, except that you can't play Characters from your Fighter Pool. Instead, you can rearrange cards in your Character, Equip, and Backup Zones to new locations.
- **End Phase:** Some card effects activate during this Phase. Once this Phase is completed, it's the next player's turn.

Combat Info

The Combat Phase is where battles take place. Each battle has an attacker and a defender, each of them having separate rules. A Character card from your Fighter Pool cannot attack the turn they were put into play unless otherwise stated. A Character in your Backup Zone cannot attack unless you have no Characters in your Character Zone or unless otherwise stated.

Attacker Rules

- **Normal Attack:** An attack that costs no TP and does Basic Physical damage equal to the attacker's PLV. Attacks must be over 0 damage to be successful. A successful Normal Attack gives you 1 TP. Characters can only perform their Normal Attack once per turn unless otherwise stated.
- **Use a Card:** The player may choose to flip over a Skill or Reaction card, depending on the card's abilities. In order to play the card, you must be able to pay its costs. The card is then sent to the Discard Pile once it resolves unless otherwise stated.
- **Use an Effect:** Some cards besides Skills and Reactions can activate during the Combat Phase. Unless otherwise stated, an effect can be activated as much as you want.

Defender Rules

- **Use a Card:** The player may choose to use a Reaction card, depending on the card's effects. Unlike the attacker rules, a defender can use cards multiple times per turn, but only once per attack.
- **Use an Effect:** Some effects can be activated during an attack. Unless otherwise stated, an effect can be activated per round without limit.

Combat Zone Order

Combat Zones comes into effect whenever you go to target specific enemies with an effect that counts as an attack. Unless otherwise stated, this is the Combat Zone Targeting Order:

1. Character Zones
2. Backup Zones
3. Players

Element Rules

- Cards that are comprised of 1 or more Elements are affected by cards that only target 1 of their Elements.
- If a card requires more than 1 Element from specific cards, those cards must have all matching Elements among that group of cards.

Hit & Damage Rules

- By default, when performing a Normal Attack, your PLV goes against your target's HP. If your attack deals damage, this counts as a successful attack.
- If a card or effect has multiple hits, each separate hit counts as part of a single attack. Each hit of a single card or effect deals their own instance of damage. Only 1 hit is required to make an attack successful.
- Other cards can alter the damage dealt and received. Be sure to read them!

Defending Mechanics

- Block: Cards that “Block” attacks turn the current attack's damage to 0. Other effects and abilities of those cards still happen, however.
- Deflect: “Deflect” causes attacks to be redirected, usually to a Character or Player of your choice.
- Negate: Cards that “Negate” cause that effect to do nothing. This includes any effects that would happen whether the card is successful or not.
- Counter: Cards that “Counter” do something to the attacker instead of defending the user. If you Counter-hit, you're always attacking the previous attacker in the Chain unless otherwise stated.

Rank

All Skills, Reactions, Items, and Augments have a Rank. The Ranks are below, from the weakest being at the top to the strongest being at the bottom:

- **Normal:** The most basic of attacks. Each Character and Player can perform a Normal Attack once per turn unless otherwise stated.
- **Special:** A special attack or ability, usually weak.
- **Hyper:** A powerful attack or ability, possibly with some kickback.
- **Ultra:** Game-changers at best, they boast lots of power.
- **Devastation:** Over-the-top, possibly game-ending abilities.
- **Legendary:** The ultimate level of abilities, most likely to break the game wide open.

Damage Types

All attacks have at least one Damage Type. The Damage Type a card deals matters when it comes to certain card effects, most notably Reactions that try to do one of the Defending Mechanics. The Damage Types are as followed:

- **Basic:** Deals damage.
- **Unblockable:** Deals damage that cannot be Blocked or Deflected.
- **True:** Deals damage that cannot be Blocked, Deflected, or Negated.

Knock Outs and Hit Count Overflow

Whenever a Character's HP becomes 0, that Character is Knocked Out. The Character is then sent to their owner's Discard Pile. If there are still hits that haven't been performed when your targets are Knocked Out, they don't hit anything unless otherwise stated.

The Chain

Whenever you play a card or perform an attack or ability, you start the process known as the “Chain”. The Chain increases in size as more attacks, abilities, or cards are played to try and interact each other.

Starting a Chain is simple, but executing a large Chain may take a while to get used to, so here's a few examples.

Example Chain 1

1. Effect A (Item)
2. Effect B (Hyper Rank Reaction, Negates an Item)
3. Effect C (Special Rank Reaction, Negates a Hyper Rank Reaction)

Effect A, in this case an Item card, starts the Chain. Effect B, a Reaction, tries to negate Effect A, making it useless. Effect C, however, is then played next, which attempts to negate Effect B.

Effect C happens first. This is called “First-In-Last-Out” order, or FILO for short. Effects, Attacks, and Cards played earlier in the Chain happen later in the Chain. The end result here is that 3 cards end up being used and Effect A happens anyway.

Example Chain 2

1. Effect A (Normal Attack)
2. Effect B (Reaction, Counter-hit)
3. Effect C (Reaction, Block)

Effect A, a Normal Attack, starts the Chain. Effect B, a Reaction, performs a Counter-hit, and counts as an attack. However, Effect C Blocks the attack created by Effect B, thus preventing it from dealing damage! Effect A deals its damage normally.

Chaining Rules

Here are the rules to Start a Chain:

- Attacks can start a Chain.
- Playing a card can start or continue a Chain.
- Triggered or activated effects of cards can start or continue a Chain.

If there's a Chain already happening, you must wait for earlier Chains to finish before starting or linking new ones.

Link Effects

Some effects are specific to Chains, meaning they must always Link to a Chain to take effect. Here's a short list of Link Effects:

- The Defending Mechanics (Block, Deflect, Negate, Counter)
- Effects that target an attacker
- Effects that require other cards to be played first

Other Rules

Winning the Game

In order to win, you must be the last person or team standing. Losing the game requires one of the following conditions to happen:

- Your HP hits 0.
- Your Deck is empty when entering the Starting Phase of your turn.

Limitations

- During your End Phase, if you have more cards than your Maximum Hand Size in your Hand, you must discard cards until you have an amount of cards equal to your Maximum Hand Size in your Hand. By default, your Maximum Hand Size is 10.
- Your Deck must have at least 40 cards. Your Fighter Pool cannot exceed a Total Character Level of 100.
- Your Deck and Fighter Pool can have up to 4 of the exact same card, determined by card name, unless otherwise stated.
- Each Character and Player can have up to 5 cards in their Equip Zone at a time unless otherwise stated. If you try to add more, you must discard older cards from that Equip Zone before adding new ones.
- Each Player can have up to a maximum of 10 TP unless otherwise stated.

Augments and Items

- Items are single-use unless otherwise stated. Once used, they're sent to the Discard Pile.
- Items can be played during any player's turn during their Battle Phase.
- Augments add the effects after the "Equip" Keyword to the Character or Player they're attached to.

Archetypes

Archetypes are used to further differentiate cards from each other. Each card can have one or more Archetypes listed under their Supertypes and can be referenced in ability text to affect cards of specific Archetypes.

Zones

Zone cards, unlike other cards, are played to your Arena Zone and are limited to 1 card per Zone per player. Also unlike other cards, Zone cards have no Level, Rank, or Cost unless otherwise stated. If you play a Zone card in a Zone that already has a Zone card, the old card is destroyed as the new one enters the field.

The Last Stand

If you have no Characters on your side of the field, you're in a state called *"The Last Stand"*. While in The Last Stand, you can use Skills and Reactions from your Hand without needing to attach them to Characters. Also, if you perform a successful Normal Attack, you gain 2 TP instead of 1. Finally, all enemies can attack you directly.

Counters, Stacks, and Keywords

- Counters on cards can trigger abilities specific to them. You cannot move Counters to and from players and cards unless otherwise stated.
- Stacks are piles of cards in the Character or Backup Zone underneath their respective owner. Cards can be added or removed from their owner to activate certain abilities. You cannot transfer Stacks to and from cards unless otherwise stated. Cards inside of a Stack have none of their original effects.
- Keywords are small phrases that have specific abilities tied to them. Any keywords on a card are only active on that card. Players and cards can gain and lose keywords from other abilities.

Multiple Supertypes

A card can have multiple Supertypes, giving it the properties of each Supertype it possesses. Each Supertype grants a unique set of properties:

- **Character:** The card can be played to your Character Zone and protects you directly. It has a Level.
- **Skill:** The card can be played to a Character's Equip Zone. It can be activated as that Character's action for their turn. It has a Rank.
- **Reaction:** The card can be played to a Character's Equip Zone. It can be activated in response to another card or effect activation. It has a Rank.
- **Item:** The card is single-use and, upon activating, is destroyed unless otherwise stated. It has a Rank.
- **Augment:** The card can be played to a Character or Player's Equip Zone, granting that Character its effects. It has a Rank.
- **Zone:** The card can be played to the Arena Zone.

Keyword List

<Effect> Immune: The owner of this Keyword cannot be targeted or affected by the listed effect(s), keyword(s), counter(s), or type(s).

<Element(s)> Infused: The user's Elements are replaced by the ones listed in this Keyword. All Attacks they perform are also changed to the new Elements.

<Element(s)> Mastery: The owner deals double damage with cards that have at least 1 of the matching Elements. This doesn't stack for 2 or more matching Elements.

Arm Up <Number>: While the owner has at least this Keyword's numeric value of Equip Items attached, this Keyword grants additional abilities. They go away once the item threshold stops being met.

Aura <Number>: The owner of this Keyword gains 1 PLV for every point threshold of HP they're missing. For example, missing 12 HP with Aura 3 grants +4 PLV. Gaining HP results in losing your PLV bonus.

Backup: The owner of this Keyword's has an innate effect active as long as they're in a Backup Zone and there's at least 1 Character in the related Character Zone.

<Number> Barrier Counter(s): The owner of this Keyword Negates any effect that targets them. For each effect Negated, remove 1 Barrier Counter.

<Number> Blindness Counter(s): Whenever the victim of this Keyword attacks, flip a coin and call it. If you fail the flip, your attack does nothing. During the victim's End Phase, remove 1 Blindness Counter from them.

Bloodlust <Number>: Whenever the owner of this Keyword attacks, they gain HP equal to this Keyword's numeric value. This can stack if received more than once.

Boss <Number>: The owner of this Keyword requires an amount of Characters in your Discard Pile to be sent to your Rift Zone before being played.

Buildup <Number>: Cards with Buildup are played face-up in the Character Zone. They activate once their Stack count hits this Keyword's numeric value.

Carrier <Number>: The owner of this Keyword comes into play with an amount of Power Counters on it.

Concussion: If the victim of this Keyword receives any Damage Counters, they get Knocked Out.

Contingency <Trigger>: The owner of this Keyword can be activated from your Hand or your side of the field any time its Contingency Trigger can take place.

<Number> Curse Counter: During the victim's Starting Phase, they're sent to their owner's Rift Zone unless they pay 1 TP per Curse Counter on the victim. The choice to pay TP is optional.

Deathmark: If an ally of the victim of this Keyword is destroyed, the victim is Knocked-Out if their ally is of equal or higher Level.

<Number> Drain Counter: The victim of this Keyword has -1 PLV for each Drain Counter on it. During the victim's End Phase, remove 1 Drain Counter from it.

Equip <Target>: Put the owner of this Keyword in its target's Equip Zone. Once attached, it counts towards the target's Equip Total and gives them its abilities.

Flash: The owner of this Keyword can attack the turn it comes into play instead of waiting a turn.

<Number> Fracture Counter: If the victim of this Keyword attacks, put Damage Counters on them equal to how many Fracture Counters they have.

Level-Up <Character(s)>: The owner of this Keyword has an additional cost requirement of the listed Characters or card criteria. If you own and control these card requirements on your side of the field and they can attack this turn, you can play the owner. Place the owner on top of those cards. They're now in a Stack underneath it.

Lock-On: The owner of this Keyword can attack or be used to attack Players and Characters in Backup Zones directly regardless of their position in the Combat Zone Order.

Multistrike <Number>: The owner of this Keyword gains an extra amount of uses of their Normal Attack equal to the numeric value of this Keyword. This can stack if received more than once.

Mute: The owner of this keyword's effects, except for Mute, are ignored and cannot be activated.

Mystify <Cost>: You may play the owner of this Keyword face-down. When the card is revealed, you may pay the Mystify cost to gain additional effects.

Mythical: Only 1 copy of the owner of this Keyword can be in a Deck or Fighter Pool at any time.

Overdrive <Cost>: When you play the owner of this Keyword, you may pay its Overdrive cost to gain additional effects.

Paradox: If the Characters you control share Elements with every listed Element on the owner of this Keyword, this card's Paradox effect is triggered.

<Number> Paralyze Counter: The victim of this Keyword cannot act. During the victim's End Phase, remove 1 Paralyze Counter from them.

<Number> Poison Counter: During the victim of this Keyword's Starting Phase, remove 1 Poison Counter from them and put 1 Damage Counter on them.

Power Source <Number>: During your Starting Phase, the owner of this Keyword gives you an amount of TP equal to this Keyword's numeric value. This Keyword can stack if received more than once.

Provoke: If any owners of this Keyword are within range of any attacks being made, at least 1 of that attack's targets must have Provoke. If more than 1 target has Provoke, you must target as many of them as possible.

Reinforce <Number>: If the amount of Character cards in your Backup Zone reaches the owner of the Keyword's numeric value, this card's Reinforce effect is triggered.

Replay <Cost>: You may pay the owner of this Keyword's Replay cost to play it again before it's destroyed.

<Number> Shield Counter: The owner of this Keyword Negates any attack that targets them. For each attack Negated, remove 1 Shield Counter.

Stacker <Number>: The owner of this Keyword requires an amount of cards equal to its numeric value in your hand to be put in a Stack underneath it when it comes into play.

Surprise: Reactions with Surprise are played in their owner's Player Equip Zone face-down and are not flipped over and paid for until its Surprise requirements of the card are met.

Tag-Out: Once per turn, during any Phase, you may move this Character to a different Character or Backup Zone you own and control.

<Number> Timebomb Counter: Add an amount of Timebomb Counters equal to this Keyword's numeric value to your targets. During each victims' End Phase, add 1 Timebomb Counter to them. If they have 5 or more Timebomb Counters, they get Knocked Out.

Timid <Number>: The owner of this keyword cannot attack or target Characters that have a Level equal to or higher than this Keyword's numeric value.

Vengeance <Trigger>: If an ally of the owner of this Keyword gets Knocked Out, the listed effect occurs.

Void: The victim is sent to their owner's Rift Zone if they are destroyed.

Wildcard: The owner of this Keyword counts as having all Elements, excluding Null-Type.

Legends

Legends are extremely powerful cards meant to be taken on as a group in a co-operative experience. Each Legend card has their own set of unique rules for the number of players playing the game and comes with some text-only cards for other special abilities in their own personal deck. Below are some clarifications on rules related to Legends.

- Legends can't be Muted, Destroyed, or Rifted by any means and must be Knocked Out by reducing their HP unless otherwise stated.
- Legends have TP that they can gain and spend as well on other cards in their Deck. Unlike Players, once they can spend TP, they must spend it.
- Legends, upon drawing a card, must reveal the card. If they can't afford it, they may put the card in their Equip Zone if applicable or discard it.
- Legends can have any number of cards in their Equip Zone.
- Legends have a Deck comprised of 20 cards. Once a Legend runs out of cards in their Deck, all cards they've discarded are shuffled and put back in their Deck the next time they would draw.
- A Legend's Deck can have any non-Legend cards in it, including Character cards.
- A Legend's Deck cannot have Characters with no Level.
- A Legend's cards are NOT immune to Mute, Destroy, or Rift effects unless otherwise stated.
- Legends are similar to Players in that they do not count as a Character. They do not go in the Character or Backup Zone, instead taking up the same position as Players in the Combat Zone Order.
- Only one Legend card and their Deck should be fought at a time. I can't recommend playing against more than one at a time.
